

[DRAFT] Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: November 15, 2010

Water Body Under Evaluation:

Water Body ID #: 3441
Name: Tributary of East Fork Sin-A-Bar (Class C)
Length of Segment: 3.8 miles
County (ies): Lafayette

Use Attainability Analysis (UAA) Study:

UAA ID #: 0956
Submitter: SES. Inc
Date(s) Conducted: September 16, 2008
Date Received: October 14, 2008
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
☐ 3-Non-Remedial, Human Caused Condition.
☐ 4-Hydrologic Modifications.
☐ 5-Natural Physical Features.
☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in September 2008 and no WBCR was observed. A tree stand was photographed at site #3 indicating hunting occurring around the area and suggesting SCR. No interviews were conducted during this survey.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream met the maximum depth criterion for WBCR, however it was determined that at least 10.9 cm (4.3 inches) of precipitation fell the 10 days leading up to study. The committee found this study to be inconclusive because it was not conducted at base flow conditions. Therefore, the WBCR use can not be removed. The committee also recommends that the SCR use be added.

Committee Recommendation:

☐ Add Use ☐ Retain Use ☐ Remove Use
☐ Modify Use ☒ Inconclusive
